

Do you feel safe? **Sensafety App**

Let us know if you currently feel safe at your location and explore how safe your neighborhood is perceived by others.

Sensafety is available here:

WHAT DOES SENSAFETY STAND FOR?

Capture

Sensafety asks you for your current feeling of safety and, depending on your location, about the reasons for your personal rating.

Evaluate

Sensafety evaluates the ratings of all users and determines a location- and time-dependent indicator for the perceived safety.

Inform

Sensafety shows the indicators of perceived safety for each location worldwide colorized on a digital map.

WHO WE ARE

As a research group at the Technische Universität Berlin we work on new and innovative technologies to foster the mobile participation in the city of tomorrow. Sensafety is just one of our exciting projects in the research field of smart cities.
